## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 and 13-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Settle (6330786) in view of Sandor et al (5597649).

Settle teaches a woven fabric having warp and weft yarns or knitted fabric (Column 2, lines 1-9) for clothes comprising a yarn of a known form comprising polyamide (Column 3, line 46) and silk (Column 3, line 38) in a state of mutual contact, by spinning, plying, or other suitable structures (Figures 2, 3). While Settle essentially teaches the invention as described, he fails to specifically teach the use of titanium oxide in an amount of 0.01 - 5.0% by weight. Sandor teaches that is well known to utilize titanium oxide in nylon fibers. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to utilize titanium oxide as taught by Sandor, so as to deluster the yarn of Settle, making it more natural in appearance while also providing a degree of cut resistance to the yarn, expanding its capabilities. The ordinarily skilled artisan would appreciate the fact that delustering makes synthetic materials appear more natural, as well as appreciated the additional environments the yarn could be used in, and would have known to do such. In regards to an amount of 0.01 - 5.0% by weight, such would have been obvious so as not to lose the benefits of the nylon material. It is also a well

known amount in the art, as evidenced by Matsumoto et al (5497608) in his example found in Column 26, lines 60-66.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-10 and 13-21 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
